

Lean & Six Sigma in Finance Credit Simulation

Get to know Lean Six Sigma as part of a practice-oriented management simulation for the finance sector!

The aim of the simulation game is to optimize a credit process with regard to lead time, quality, and costs.

You will be amazed at what you can achieve in a day.

Content

- Kreditbank AG is the regional market leader for real-estate financing. The bank has four branches which offer real-estate loans. The final processing of the applications and the decision on the financing are made at the bank's headquarters (the Kredit factory).
- It is very important for the branches to process applications quickly and correctly, so that they can simultaneously guarantee service quality and low costs.
- Each player represents one of the departments involved in the processing of loan applications (e.g. interest calculation, credit check, credit decision, etc.).
- After the first round, the process is reviewed and optimized with the aid of Lean Six-Sigma tools. The second round of the game illustrates the tremendous improvement that can be made.

Further information

- Training language: German or English
- Duration: 1 day (8 hours)
- Price: EUR 475 (plus VAT)
- Participants: 8 – 20 people
- Location: procise gmbh, Frankfurt or as in-house training upon request

Requirements for in-house training:

Room (at least 50 m²), 9 freely-movable tables, video projector, flip chart, metaplan board; the simulation with expendable material will be provided by procise
